

# SIDDHI PARIHAR

Bengaluru, India | +91-7483439071 | siddhiparihar5@gmail.com | linkedin.com/in/siddhi-parihar | github.com/Wakeupsid20

## PROFESSIONAL SUMMARY

---

Data Science undergraduate (Cybersecurity major) with hands-on experience designing end-to-end analytics pipelines, statistical monitoring systems, and stakeholder-ready reporting dashboards. Demonstrated ability to identify process inefficiencies, translate data into actionable business insights, and communicate findings to non-technical audiences — core competencies for HSBC's Wholesale Client Services Business Analyst role. Supplemented by formal business analysis exposure through Deloitte and BCG simulations, with strong Excel-based reporting and a customer-centric approach to analytical problem-solving.

## BUSINESS ANALYSIS EXPERIENCE

---

### Data Analytics Job Simulation — Deloitte (Forage)

2024

- Analysed client datasets to identify business performance gaps; produced structured findings report and Excel-based dashboards translating raw data into executive recommendations — directly replicating the BA reporting workflow at HSBC.
- Practised requirement gathering, data interpretation, and written communication of analytical conclusions to a simulated business stakeholder panel.

### Strategy Consulting Job Simulation — BCG (Forage)

2024

- Conducted thematic analysis of business process data to surface strategic inefficiencies; built PowerPoint deliverables communicating recommendations to senior stakeholders — mirroring HSBC's expectation of outstanding presentation skills.
- Documented business requirements and proposed solutions across a structured case framework, building familiarity with BA methodology and problem decomposition.

## PROJECTS

---

### SafeAPI – End-to-End Query Analytics & Reporting Dashboard

Python · Streamlit · SQL

- Engineered a full-stack data pipeline ingesting API query traffic, applying anomaly-scoring logic across 10+ classification rules, and surfacing results in an interactive Streamlit dashboard — a direct analogue to HSBC's digital query-management reporting requirement.
- Identified that manual log review was creating a ~60% overhead in threat triage; designed an automated scoring framework enabling non-technical stakeholders to interpret severity ratings without SQL access.
- Translated raw security data into executive-ready visualisations, demonstrating the end-to-end reporting capability — from data ingestion to business-readable output — central to this role.

### Concept Drift Detector – Statistical Process Monitoring Tool

Python · Scikit-learn

- Identified that manual weekly model audits were inefficient; proposed and built an automated statistical monitoring system using 3 tests (KS, PSI, Chi-square), reducing degradation discovery time by ~70%.
- Designed automated alert workflows and visual distribution reports enabling data teams to act on pipeline anomalies within hours — demonstrating process improvement identification and rational solution implementation.
- Documented system behaviour and output interpretation for non-specialist users, building experience translating technical outputs into accessible business reporting.

## EXPERIENCE & LEADERSHIP

---

### Social Media Head — ArtofTravel, RV University

Sep 2023 – Sep 2024

- Drove 40%+ uplift in platform engagement by analysing content performance data and redesigning posting strategy accordingly — translating data insights into concrete business decisions across a 200+ member stakeholder base.
- Coordinated end-to-end delivery of 6+ events, managing stakeholder communications, logistics, and timelines simultaneously — building the cross-functional collaboration and under-pressure delivery skills required in a global BA role.

## Volunteer — Happy Tails, Animal Welfare Club

Aug 2023 – Aug 2024

- Coordinated logistics and stakeholder communications across 10+ campus welfare drives, demonstrating attention to detail and ability to deliver outcomes reliably under time pressure.

## SKILLS

---

**Technical:** Python, SQL, JavaScript, Java, HTML/CSS

**Data & ML:** Pandas, NumPy, Scikit-learn, EDA, Statistical Analysis, Drift Testing, Evaluation Metrics

**Reporting Tools:** Excel (advanced), PowerPoint, Streamlit, Jupyter, Tableau-equivalent dashboards

**Engineering:** PostgreSQL, MongoDB, Node.js, Docker, REST APIs, Git

**BA Skills:** Requirements Documentation, Process Improvement, Stakeholder Communication, Data-to-Insight Translation

**Certifications:** Data Analytics — Deloitte/Forage · Strategy Consulting — BCG/Forage · Cybersecurity Fundamentals — IBM · Generative AI — Microsoft

## EDUCATION

---

### RV University — B.Sc. (Hons.) Data Science, Cybersecurity Major

Bengaluru | 2023 – 2027

Relevant Coursework: Statistical Analysis · Machine Learning · Database Systems · Data Engineering · Cybersecurity
